

Roberto Quirós Martínez

Academia 2010

Roberto Quirós Martínez
Spain Representative-Academia2010

In order to introduce myself, I have to say that I work like a teacher in a High School, with pupils from 16 year-old and over. The students learn a profession like electrician, mechanic, bussines administration, computing... My main task is to learn them the workable rights and duties and how to create a bussines. In addition, I offer them a professional and academic orientation. This is my ninth year teaching, and my fifth year working in the "Carmen y Severo Ochoa" High School of Luarca (Asturias). You can get more information (in Spanish) on our High School's web page www.iesdeluarca.es and in my personal web page www.robertoquiros.es

My personal interests are focused on (road) cycling and mountain trekking.

My main fear is that I don't like beer (oh my God, what will I drink one week in Dublin?).

We will see ourselves in Dublin!
